Conclusion

The fundamental questions that need to be asked when thinking about Artificial Intelligence:

- Is the AI doing the thinking for me?
- Are there possible biases that the AI could have that may impact a certain demographic?
- Does this use of AI oppose or violate any human rights?
- Is the AI making a decison that humans should be making?

Lesson 1. Algorithms

Lesson 2. Data Training for AI

- **Lesson 2.1 Inherent bias against certain demographics**
- **Lesson 2.2 Red Apple Effect**
- **Lesson 2.3 Sycophancy and Confirmation Bias**
- **Lesson 2.4 AI in Healthcare**
- **Lesson 2.5 Ethical Data Mining**

Lesson 3. Augmenting vs Substituting

Lesson 4. Personal Data

- **Lesson 4.1 Data Consent**
- **Lesson 4.2 Privacy and Surveillance**

Lesson 5. Copyright Issues and Ownership

Lesson 6. Moderation

Lesson 7. Environmental Concerns

Lesson 8. Money in AI

Lesson 9. Automation

Lesson 10. Children's Safety

- **Lesson 10.1 AIG CSAM and Children's Safety**
- **Lesson 10.2 Mitigation Strategies for AIG CSAM**
- **Lesson 10.3 Sharenthood and Minor Protection on the Internet**

Lesson 11. Education
